GLOBAL PORTLAND PRESS AUTHORS, 2021

OPEN SCHOLARSHIP

As an independent society publisher, we're committed to an open research landscape that supports global scientific advancement. As well as assessing how best to transition to full open access (OA) publishing, we've implemented policies that support open data and improved transparency on author contributions and have integrated the unrestricted availability of article citations, references, and abstracts. Our transformative Read & Publish models are helping us sustainably transition to full OA, providing researchers with unlimited OA publishing and full read access to all our journals.

Find out more about our path to open scholarship at

MEMBERSHIP

Welcoming members from all over the world, the Biochemical Society offers a range of tailored membership categories to support lifelong learning at every career stage.

biochemistry.org/membership

EVENTS

From scientific meetings and training courses to a wide-ranging webinar series, the Biochemical Society brings together leading bioscientists in academia and industry to share knowledge and enhance their skills.

biochemistry.org/events-and-training

GRANTS AND BURSARIES

Each year, the Biochemical Society provides more than £250,000 to support research and professional development, attendance at scientific meetings, and the organization and hosting of events and activities through sponsorship.

[@BiochemSoc](https://twitter.com/BiochemSoc)

As the Biochemical Society's publisher, we work in partnership with researchers, institutions, and funders to share knowledge and advance the molecular biosciences.

Publishing world-leading research and reviews across our portfolio of seven journals, we return all of our profits to the life science community in support of our Society's charitable activities. With more than four million worldwide article views in 2021, our journals cover the depth and breadth of the molecular biosciences, from observational work to interpreting mechanisms, from translating basic research into medical insights to foundational overviews of new and emerging topics.

BIOCHEMICAL JOURNAL

For over 100 years, the *Biochemical Journal* has been at the forefront of biochemical advancement, breaking new ground in the fields of biochemistry, cellular biosciences, and molecular biology. The *Biochemical Journal* publishes research that goes beyond observational work, articulating new insights and deepening the wider community's understanding of biological processes.

Chair of the Editorial Board: Mark Lemmon

CLINICAL SCIENCE

Translating molecular bioscience and experimental research into medical insights, papers published in *Clinical Science* cover a range of topics, including the cardiovascular system and vascular biology, genomic medicine, inflammation, nephrology, hepatology, cancer biology, and the respiratory system..

BIOSCIENCE REPORTS

Providing a platform for valid findings and data, *Bioscience Reports* is a fully open access journal publishing sound scientific research in all areas of cell biology and the molecular life sciences. Assessed on soundness alone, accepted papers are indexed in DOAJ and published under the liberal CC BY license.

NEURONAL SIGNALING

Publishing high-quality molecular and cellular neuroscience research, *Neuronal Signaling* provides the ideal open access platform for a variety of neuroscientific disciplines, including basic signaling interests (such as neurotransmitters and receptors) and signaling aspects of pathologies.

ESSAYS IN BIOCHEMISTRY

Highlighting key contemporary topics in biochemistry, *Essays in Biochemistry* is a fully commissioned journal that brings together reviews from leading experts. From antimicrobial resistance to the biological mechanisms of ageing, themed issues are guest edited by key opinion leaders, offering up-to-date summaries of changing specialist research areas.

EMERGING TOPICS IN LIFE SCIENCES

Reflecting the interdisciplinary nature of life science research, *Emerging Topics in Life Sciences* is a fully commissioned journal jointly owned by the Royal Society of Biology and the Biochemical Society. Guest edited by leading experts, themed issues focus on new or growing key topics, keeping readers up-to-date with all of the latest advances from across the life sciences.

Editor-in-Chief: Paula Booth

The **Biochemist**

The official magazine of the Biochemical Society, *The Biochemist* is an essential read for anyone interested in the fundamental processes of molecular biology, health and disease. Published bi-monthly, themed issues keep readers up-to-date with news and views of relevance to the molecular bioscience community.
